Subject: Honeywell R7910A, B Certification as a Temperature Limit Control

To whom it may concern,

This memo serves to inform interested parties of the agency certification of the Honeywell R7910A, B integrated boiler control certification as a temperature limit control.

The R7910A, B integrated boiler control implements several functions including automatic gas ignition, limit rated temperature control, pump control, input monitors, and variable firing rate burner control.

In reference to the temperature limit control, the control is certified under the Standard for Limit Controls, UL353.

This certification is listed under File MP268 Vol. 41 Sec. 4. A copy of this certification is attached.

Regards

Rich Simons
